2 Hdmi Encoded Media

Encoded Media HD Encoder 2/HDMI is a small, self contained, multipurpose hardware appliance that takes two HDMI sources - for example, a video camera and a laptop or digital signage boxes - and makes them available to others on your network. Its 500GB internal storage allows it to record continuously, via schedule, or through IP room control.

HDMI 2.0, referred to by some manufacturers as HDMI UHD, was released on September 4, 2013. HDMI 2.0 increases the maximum bandwidth to 18.0 Gbit/s. HDMI 2.0 uses TMDS encoding for video transmission like previous versions, giving it a maximum video bandwidth of 14.4 Gbit/s. This enables HDMI 2.0 to carry 4K video at 60 Hz with 24 bit/px color depth.

HDMI - Wikipedia

With HDMI® outputs becoming ubiquitous, HDMI/DVI transmitters remain in high demand in many professional, consumer, and automotive video applications. Analog Devices diverse solutions offer competitive advantages such as automotive qualification, low power, and small packages (3.4
