Don't cut off important parts of your subject with the edge of your frame.

Keep your horizons level, and try to eliminate any distractions in your photo by adjusting your composition. See if your photo has a sense of balance and simplicity. And if the photo doesn't look good on your first try, keep experimenting until you get it right.

In photography, sometimes you can move that light source, and other times you have to move the subject to alter the position of the light. Front lighting, or placing the subject so that light is directly in front of the person or object, brings out the detail.

The Ultimate Guide to Learning

Online Library Advancing Your Photography Secrets To Amazing Photos From The **Photography: Lighting for ...**

If you want to improve your street photography (or portraiture) by a thousand percent then paying attention to a person's eyes is the way to do it. People can be so skilled at hiding their emotions on their faces but their eyes will never lie. I see too many street photos with blank stares these days.
