The documentary film "Zoochosis" digs into the underlying causes of these abnormal, seemingly mindless behaviors. The behaviors displayed by zoo animals range from pacing, to rocking and ...

Zoochosis: What Really Happens to Animals in Captivity ...

Like the study of abnormal behavior, making a documentary, is not as straight forward as it might seem. I needed to get access to vital information, key people and research and for that to happen I needed more than an 'empty-pocket-student-budget'. In two days I created a Kickstarter Campaign to crowfund the costs of making 'Zoochosis'.

GRADE 5 LITERACY: TCRWP NONFICTION READING AND OPINION ...

According to the article Zoochosis, the authors Stephanie Santana and Shawn Lukose have documents that show many animals are showing Zoochosis. One example is animals pace back and forth. The second example is they twist their neck and bob their heads up and down. The third example is that animals grab and chew on the bars of their cage.

Strother's Published Writing

The Low-Down on Zoochosis. Captive zoo animals have been documented, from New Zealand to Egypt to the U.K. and the U.S., to exhibit symptoms of neurological distress.

Zoochosis and the Many Ways We Have Failed Zoo Animals ...

Zoochosis is a word used to explain the stereotypical behavior of animals in captivity. The stereotypic behavior is described as an invariant, repetitive behavior pattern with no apparent goal or function. Animals in zoos and other forms of captivity suffer from stress and depression and display unusual behaviors.

What is Zoochosis? - WorldAtlas

Zoochosis is a psychologically dismaying phenomenon that affects animals who are caged in the zoo. According to the organization Circus Watch WA, this term was coined by Bill Travers in 1992 to describe the obsessive, repetitive behavior of animals held in captivity. And the animals showing such abnormal behavior were called as zoochotic.

NAME OF ASSESSMENT: STANDARDS ASSESSED

Many researchers have described these sorts of behaviours as 'hypnotic', hence the term 'zoochosis'. As defined by Bill Travers in 1993, a zoochotic animal is an animal 'mentally damaged by captivity', and thus exhibits stereotypic, obsessive, unnatural behaviour. So despite having the good intention to prevent endangered species ...
