weight kill fluids, reduced operational footprint, horizontal intervention, and the ability to intervene without a rig.

Coiled Tubing Solutions - OilProduction.net

Once the coiled tubing size, flowrates and N2 volumes have been determined, the following should be conducted: 1. Rig up the coiled tubing and

Bookmark File PDF Coil Tubing Manual

pressure test as per standard procedures.
2. Displace the coiled tubing to N2 and perform gas pressure test if required by client. 3. Open well and commence running in hole at 50 ft/min (15 m/min).

Coiled Tubing has become one of the most widely used tools in the well intervention sphere, with applications in all areas of the well life cycle. Some of these include:

- Stimulation - through acidizing or pinpoint hydraulic fracturing
- Completion - such as plug millouts in unconventional wells

Handbook ~ Oil and Gas Book Reference

The Slip Type Connector is an external type connector that engages the outer diameter of the coil tubing. The slip ensures that axial load is transferred into the tubing, increasing the strength of the connector grip on the tubing.
