Gendering Climate Change: Geographical Insights : IBZ Online

Drawing on insights from feminist scholars and activists, this article examines the dialectical relationship between climate change and the social construction of gender. We examine in detail how gender inequalities associated with capitalism, particularly in its latest neoliberal incarnation, help to produce global warming, as well as to produce gendered vulnerabilities and unequal impacts.

Gendering Climate Change: A Feminist Criminological ...

Whereas the concepts of class, poverty and race make regular appearances in social scientific analyses of global climate change, the same cannot be said for gender. A survey of the academic literature suggests that there is a lack of research into the many gender dimensions of climate change.

'Gender and climate change': from impacts to discourses ...

Climate change has a greater impact on those sections of the population, in all countries, that are most reliant on natural resources for their livelihoods and/or who have the least capacity to respond to natural hazards, such as droughts, landslides, floods and hurricanes.

1 INTRODUCTION. When the Intergovernmental Panel on Climate Change issued its First Assessment Report in 1990, research on climate change vulnerability primarily framed the issue in terms of exposure to physical impacts on particular sectors (e.g., water, agriculture), regions (e.g., the Andes, Southeast Asia), and countries, but offered little by way of analysis of the social drivers of ...

Explaining differential vulnerability to climate change: A ...

However, some have argued for a more critical engagement of geography with climate change, its politics and policies (Bailey, 2008). Further, Sultana (2014) argues for a greater engagement with the gendered implications of climate change as well as with the potential of adaptation strategies to change gender relations.

Human-Environment Geography perspectives on Climate Change ...

African climate change research reflects diverse mixtures of local priorities and international trends, often with some time lag. The research reviewed and represented in this special issue reveals clear gaps and weaknesses in relation to gendered understandings, approaches to environmental valuation, and climate and environmental justice.

As adaptation policies increasingly aim to recognize the agency and autonomy of marginalized groups, the push for gender-sensitive climate change policy is also gaining voice and visibility. This shift is akin to the growing popularity of rights-based approaches to development, suggesting that lessons can be drawn from previous gender and development debates to inform adaptation policy and ...

Gender, Development, and Rights-Based Approaches: Lessons ...

Donors, governments, non-government organisations and humanitarian agencies are increasingly investing in disaster risk reduction (DRR) but there is limited understanding of the outcomes of these investments at community and household levels. This paper presents empirical data from nine communities across three islands in Vanuatu that experienced a direct hit from category 5 tropical cyclone ...
