Getting to grips with stress in the workplace: Strategies ...

When INFJs are experiencing chronic stress or sudden, extreme stress, they may fall into the grip of their inferior function: Extraverted Sensing. This isn't your everyday normal stress either, the stress has to be pretty intense or lengthy to push an INFJ to this point. You can see more details about this in the handy infographic I made below (you may need to click on it to see it well):

Understanding INFJ "Grip" Stress - Psychology Junkie

Getting To Grips With Stress 1st April sees the start of our national month of awareness of this very 21st problem but it is far from a joke. It is a massive problem in the UK with millions of working days lost every year, and damaging our physical and mental health. Stress is massively misunderstood.

You may have to experiment to find the right thing to help bring you out of the grip experience. In general, though, time alone in a silent, low-stress environment helps. Removing as much external stimulation as possible is key for a lot of INFJ women. Lighten your load for a bit and clear some things from your schedule.

What happens to an INFJ "in the grip?" (extreme stress)

Have you ever felt that you seem to feel more impacted by stress than most people? Luckily there are things you can do about it. If you do nothing, this will likely worsen and become even worse the older you get. I hear from a lot of HSPs who believe their sensitivity has worsened with age and I believe this is one reason why.

Stress & Sensitivity Can Worsen With Age for HSPs. Here's ...
