7) A couple of extra change gears with splined centers are needed to cover all the thread ranges. Try to find these with the lathe. The folks at Lathes UK will also make them for you at about half the cost the Harrison/600 group folks want. 8) The Chinese M300's have been out for a while and are a lesser machine.

Harrison M300 at auction. - Practical Machinist

I am a complete newbie to the Harrison M300 but have acquired an old machine needing a strip and rebuild with slides to be reground etc. Can anyone explain in general terms the sequence in which to strip the lathe, and in particular how to remove the apron and its associated feed screws, control rod etc.

M390

On my 290 lathe I made an extra gear to cover thread pitches not covered by the original Thread Dial gear. I used Delrin and it has worked well for several years, the width of the Delrin gear wheel is the same as the original supplied with the lathe Thread Dial, the diameter is different of course. Thor. Colchester Student 2500 (Harrison M300) | Model Engineer

As far as I know from speaking with the Harrison rep in MA, the M300 was always built there. Some other Harrison manual lathes wandered a bit (M390 from Taiwan ??) until Harrison decided to make the manual machines in China. The later UK built M300 had a facelift to the black and white scheme and change of control knobs and headstock design.

Lathe recommendation? - thread cutting important - The ...

Many of these are based on the older UK Harrison M300 brand and once updated to current safety regs, they have issues. The biggest is they fit spiral spring guards to the leadscrew and it's impossible to get a normal tool to touch the face plate or even close as there is no dead space for the spring to coil up.
