Laika (Russian: Лайка; c. 1954 - 3 November 1957) was a Soviet space dog who became one of the first animals in space, and the first animal to orbit the Earth. Laika, a stray mongrel from the streets of Moscow, was selected to be the occupant of the Soviet spacecraft Sputnik 2 that was launched into outer space on 3 November 1957.. Little was known about the impact of spaceflight on ...

Laika - Wikipedia

This is a question that has no single, correct answer. Some papers state that dog domestication occurred 130,000 years ago, others claim it's closer to 15,000. Smithsonian reported that dogs were likely first domesticated around 40,000 years ago. Genetic studies conducted using Neolithic dog fossils showed genetic mutation that backs that number, and further revealed similarities between these early dogs and the dogs we live among today.
