3.2. Nonlinear Dynamics of the Unit. When $\omega_C \approx \omega_S$, the sun gear, the ring gear, and the carrier have almost the same speed and f_m approaches to zero. Simulation results show that serious vibrations occur under this situation; therefore, homogenous speed of the sun gear and the carrier should be avoided and should be stepped over as fast as possible.

Chaos theory is a branch of mathematics focusing on the study of chaos—states of dynamical systems whose apparently-random states of disorder and irregularities are often governed by deterministic laws that are highly sensitive to initial conditions. Chaos theory is an interdisciplinary theory stating that, within the apparent randomness of chaotic complex systems, there are underlying ...
