In mathematics, more specifically in linear algebra and functional analysis, the kernel of a linear mapping, also known as the null space or nullspace, is the set of vectors in the domain of the mapping which are mapped to the zero vector. That is, given a linear map $L : V \rightarrow W$ between two vector spaces V and W , the kernel of L is the set of all elements v of V for which $L(v) = 0$, where 0 ...
