Plant Structure Unit Exam Aventa Answers

A plant has two organ systems: 1) the shoot system, and 2) the root system. The shoot system is above ground and includes the organs such as leaves, buds, stems, flowers (if the plant has any), and fruits (if the plant has any). The root system includes those parts of the plant below ground, such as the roots, tubers, and rhizomes.

section1 - DoDEA

Lab: Plant Structure: the Plant Body: Part Two . STEM: The stem supports the aerial portion of the plant and transports materials (water, minerals and food) to and from the various organs of the plant. Some plants (cacti and Palo Verde trees are two Arizona examples) carry out photosynthesis in their stems.

section1 - content.dodea.edu
