Slightly bigger and wider than its predecessor, the 997 looked much more aggressive and sporty than the 911 it replaces. Sitting in the rear, the base models had 3.6L naturally aspirated flat-six engines that produced 325 horsepower. S models received larger 3.8L engines making it the largest engines for 911s up until that point in time.

The new engine used the same construction as other 997 Gen II DFI engines. The previous engine's Nikasil cylinder liners were replaced with an Alusil block that combined the cylinders and crankcase into an integrated casting for each bank, thus reducing weight (in contrast to a separate cylinder block and crankcase for each bank).
