Alfred Adler's school of individual school of psychology created a chasm in the field of psychology, which had been dominated by Freud's psychoanalysis. While Freud focused on only the internal processes — mainly sexual conflicts — that affect a person's psychology, Adler was adamant that to fully understand a person, a psychologist must also consider other internal factors as well as external factors.

Alfred Adler - Individual Psychology | Simply Psychology

Sigmund Freud's psychoanalysis was the original psychodynamic theory, but the psychodynamic approach as a whole includes all theories that were based on his ideas, e.g., Carl Jung (1912), Melanie Klein (1921), Alfred Adler (1927), Anna Freud (1936), and Erik Erikson (1950). The words psychodynamic and psychoanalytic are often confused. Remember that Freud's theories were psychoanalytic, whereas the term 'psychodynamic' refers to both his theories and those of his followers.
