Sliceform modelling is a technique which lies happily on the borders between art and mathematics. The models are made from intersecting sets of parallel planes which slot together in a clever way to generate interesting three-dimensional surfaces. In the fully open position the planes are at right angles and the surfaces are correctly defined, but all the models fold flat.

About 25 years ago I met John Sharp and was introduced to Sliceforms. I have made many paper and card sliceforms since, so when I bought a 3D printer they seemed a good thing to make. The sphere has five different pieces. You need to print: 2 of 1.2 sphere 0 4 of 1.2 sphere 1 4 of 1.2 sphere 2 4 of 1.2 sphere 3 4 of 1.2 sphere 4 Obviously, because of the thickness of the print, the shape does ...
