review of John Searle, The Rediscovery of the Mind, MIT Press, 1992, 270pp, \$22.50. 1. Searle's challenge. Everyone agrees that consciousness is a very special phenomenon, unique in several ways, butthere is scant agreement on justhow special it is, and whether or not an explanation of it canbe accommodated within normal science.

Review of Searle, The Rediscovery of the Mind

This is the name John Searle gives is philosophy of mind. So what is it? The view, very broadly, is dedicated to the defense of the claim that mental phenomena are caused by neurophysiological brain processes, and that these processes are themselves features of the brain.

The Rediscovery of the Mind: Searle, John R ...

In philosophy of mind, the computational theory of mind (CTM), also known as computationalism, is a family of views that hold that the human mind is an information processing system and that cognition and consciousness together are a form of computation. Warren McCulloch and Walter Pitts (1943) were the first to suggest that neural activity is computational.
