POLARIS RANGER RZR 800 MANUAL Pdf Download | ManualsLib

Working on replacing crank in my 17 RMK 800 and wanted to know if anybody has The torque specs for the engine. Also when I broke it apart I noticed there is coolant in the right bottom crankbay, just wondering if anyone knows how it might have got there. I'm blaming the water pump seal at this point. And your help will be greatly appreciated.

this sounds crazy but these are the correct torque procedures. the torque specs are hard for the head. there is several steps. step 1 in a criss cross pattern torque them all to 22 ftlbs, then let sit one minute. step 2 then loosen each one up 360 degrees off a 1/4 turn at a time. step 3 then torque to 29 ftlbs.

Timing marks and torque specs | Polaris Riders Forum

wskypapa said: My 2012 800s, with aluminum factory aluminum rims was 30ft lbs + 1/4 turn. Be careful of the torque specs published for 2010 and 2011 800... it was stated at 90 ft lbs, the stud will break at that high of torque... I think the manual had a mis print and was corrected in 2012.

torque specs for 09 800 rmk | SnoWest

Torque ratings are for dry, not lubricated threads unless noted otherwise. Lubricated threads require less torque to get them where they need to be as the lube reduces friction so it's easier to turn. The 850 manual states 45 lbs for steel and 75 for aluminum rims dry torque.
